FOREWORD

This Guidance Document was prepared by the Technical Committee on Timber under the authority of the Standards Committee, Ministry of Development.

The purpose of the document is to collate the common design parameters involved with the design of all timber elements. The volume also presents essential design data, not readily available elsewhere, that is useful to timber designers. It will complement the individual PBD standards covering the design of various elements and as time passes act as a point of reference for the design of timber structures in Brunei Darussalam. Users of this guide should note that by its nature the document will be subject to change as new data becomes available and as subsequent PBD documents are issued.
