GENERAL SPECIFICATION FOR ROADS AND BRIDGES

PREFACE

Brunei Darussalam is a fast developing country. Infrastructure needs such as roads and bridges are continually expanding. The network of roads in Brunei Darussalam, in relation to its land mass and population, is one of the most extensive and finest in this part of the world.

Authority for the planning and implementation of the road network is vested in the Public Works Department, Ministry of Development. A consistently high standard of design, construction and maintenance is a standing objective of the Public Works Department. Towards this objective, it is necessary for a uniform set of specification to be developed and used by consultants and contractors alike.

The specification and guideline published by the Construction Planning and Research Unit (CPRU), Ministry of Development, are based on established and current practices in this region. They are further modified to suit the conditions peculiar to Brunei Darussalam.

Throughout the specification, there are references to standards and tests of the British Standard (BS), Code of Practice (CP) of the United Kingdom; American Association State Highway and Transportation Officials (AASHTO), American Society for Testing and Materials (ASTM), United States of American; and these shall mean the latest issue of these standards and practices.

The specifications contained here from part of the General Specification for Roads and Bridges developed and compiled by CPRU. They will be continually updated or amended to keep abreast of changes and modern advances in construction technology and materials.

COMMITTEE REPRESENTATION

The Technical Committee on General Specification for flexible pavement was entrusted by the Ministry of Development for the preparation of this Brunei Darussalam Standard. The members of the Technical Committee are as follows:-

1. Mr. Yong Teck Chin (Chairman) - Department of Road,
Public Works Department.
2. Hj Suhaimi Hj Abd Gafar/Mr. Yee Kok On - Department of Road,
Public Works Department.
3. Mr. Lim Lam Keong/Zahari Hj Abd Karim - Construction Planning and
Research Unit
Ministry of Development
4. Mr. Tsang Chee Wah /Mr. Adam Assaad - Jurutera Tempatan.
5. Mr. Khor Wei Chee - Petar Perunding Sdn Bhd
6. Mr. Lou Chi Tong/Dr. S.A.Sultan - Associated Consultants Sdn Bhd
/Mr. Wee Hong Joo
7. Mr. S.Panadithan/Mr. Gaston Ovellette - Bolton Hennessey.
8. Mr. Arunachal Ray/Anil Ramachandren - Baharuddin And Associates.

CONTENTS

	Page
Preface	ii
Committee Representation	iii
Flexible Pavement	
1.01 Aggregate Sources	1/1
1.02 Unbound Pavement Course	1/1 – 1/3
1.03 Bituminous Pavement Courses	1/3 – 1/6
1.04 Bituminous Tack Coat	1/6 – 1/7
1.05 Asphaltic Concrete Materials	1/7 – 1/9
1.06 Base Course And Wearing Course Mixtures	1/9
1.07 Mix Design	1/10 – 1/13
1.08 Plant And Equipment	1/13 – 1/25
Tables	
1.1 Gradation Limits For Crushed Aggregate Roadbase (Crusher – Run)	1/2
1.2 Gradation Limits For Sub-Base Material (Type A : Crushed Aggregates)	1/2
1.3 Designation of Penetration Grade Bitumen And Recommended Storage Temperatures	1/8
1.4 Composition of Base Course Mixture	1/9
1.5 Composition of Wearing Course Mixture	1/10
1.6 Range of Tolerances	1/11
1.7 Test And Analysis Parameters For Asphaltic Concrete	1/12
1.8 Maximum Temperature of Mixed Asphaltic Concrete	1/17
1.9 Pavement Course Tolerances	1/23
1.10 Maximum Permitted Number of Surface Irregularities	1/23
