PIAWAI BRUNEI DARUSSALAM

PBD 15 : Part 1 : 1994

PBD 15 : Part 1 : 1994

Attention is drawn to the fact that this Brunei Darussalam Standard does ~~NOT~~ ~~grant~~ ~~any~~ ~~immunity~~ from legal obligations in any contract for compliance to the ~~Standard~~.

The Brunei Darussalam Standards are subject to periodical review ~~according to~~ ~~the~~ ~~current~~ ~~needs~~ of the local industries to keep abreast of progress in ~~the~~ ~~industry~~ concerned. Suggestions of amendments will be recorded and in due course ~~bring~~ ~~to~~ ~~the~~ ~~notice~~ of the committees concerned.

Amendments issued since publication

Amd No.	Date of issue	Text affected

FOREWORD

This Brunei Darussalam Standard has been adopted from BS 499 : Part 1 : 1991 and prepared under the direction of the Technical Committee on Iron and Steel. It was endorsed by the Ministry of Development and was first published in 1994.

The glossary is arranged in classified sections and this layout makes it possible to find either a term to convey a particular meaning or, in conjunction with the alphabetical index, the meaning of a particular term. It is apparent, therefore, that considerable advantages are achieved over a purely alphabetical list of terms which presupposes knowledge of the term in question.

Chart showing the derivation of welding, cutting and allied processes are given in figures 1, 2 and 3. Appendices A to G give guidance on typical information to appear on a welding procedure sheet for various types of welding process.

Preferred and equivalent terms are given in bold type, non-preferred terms are given in medium type and deprecated terms are given in medium type with their status indicated.

Acknowledgment is made to the BSI for the use of BS 499 : Part 1 : 1991.

COMMITTEE REPRESENTATION

The Technical Committee on Iron and Steel was entrusted by the Ministry of Development for the preparation of this Brunei Darussalam Standard.

The members of the Technical Committee are as follows.

- | | | |
|-----|---|--|
| 1. | Pg Hj Matusin Bin Pg Hj Matasan | Ministry of Development |
| 2. | Awg. Hamdani Hj. Mohd Jamil | Ministry of Development |
| 3. | Dr. Faqir Gul | Institute Technology Brunei |
| 4. | Dr. Abdul Qayyum Malik | University Brunei Darussalam |
| 5. | Awg. Mansor Jaluddin | Maktab Teknik Sultan Saiful Rijal |
| 6. | Dyg. Masni Haji Mohsin | Ministry of Industry & Primary Resources |
| 7. | Mahendra Coomaraswamy | Pertubuhan Ukur Jurutera Akitek (PUJA) |
| 8. | Lawrie Harris | Cooper Macdonald & Partners |
| 9. | Chee Wah Tsang | Jurutera Tempatan |
| 10. | Nicholas Leong Soon Kong | Brunei Shell Petroleum |
| 11. | Dyg. Hj. Maihani bte
Hj. Abdul Hamid | Public Works Department |
| 12. | Lai Foo Juat | Public Works Department |
| 13. | Michael Khoo | Interline Roofing Co. (B) Sdn. Bhd. |

Foreword	Inside front cover	F. Typical information to appear on welding procedure sheets for fusion welding processes	101
Committees responsible	Back cover	G. Typical information to appear on a cutting procedure sheet for oxygen flame cutting	102
Glossary			
Section 1. Terms common to more than one section	6	Table	
Section 2. Terms relating to welding with pressure	15	1. Terms and symbols for main welding positions	55
Subsection		Figures	
21. Terms relating to more than one subsection	15	1. Chart of derivation of welding processes	3
22. Terms relating only to resistance welding	16	2. Chart of derivation of brazing processes	4
23. Terms relating only to pressure welding	38	3. Chart of derivation of thermal cutting processes	5
24. Terms relating only to ultrasonic welding	38	4. Root, fusion, penetration, weld junction and zones of typical welds	7
25. Terms relating only to diffusion welding	39	5. Examples of series spot welding	17
26. Terms relating only to explosive welding	39	6. Mash weld	19
27. Terms relating only to friction welding	40	7. Weld nugget	19
28. Terms relating only to magnetically-impelled arc butt welding	40	8. Vertical centre electrode	20
		9. Vertical offset electrode	20
Section 3. Terms relating to fusion welding (welding without pressure)	41	10. Angle offset electrode	21
Subsection		11. Cranked offset electrode	21
31. Terms relating to more than one subsection	41	12. Time and pressure diagram for simple spot, stitch or projection welding	24
32. Terms relating only to arc welding	62	13. Time and pressure diagram for pulsation spot or projection welding	24
33. Terms relating only to gas welding	73	14. Time and pressure diagram for spot or projection welding, programme control	25
34. Terms relating only to aluminothermic welding	75	15. Time and pressure diagram for pulsation spot or projection welding, programme control	25
35. Terms relating only to electron beam welding	76	16. Time and pressure diagram for spot welding, programme control with dual-pressure cycle	26
36. Terms relating only to electro-slag welding	80	17. Time and pressure diagram for seam welding	26
37. Terms relating only to light radiation welding	81	18. Time and pressure diagram for step-by-step seam welding	27
		19. Time and pressure diagram for roller spot welding	27
Section 4. Terms relating to braze welding and brazing	82	20. Time and pressure diagram for step-by-step roller spot welding	28
Subsection		21. Time and pressure diagram for straight flash welding	28
41. Terms relating to braze welding	82	22. Generalized diagram of speed, applied force, axial movement and time for continuous drive friction welding	29
42. Terms relating only to brazing	83	23. Generalized diagram of speed, applied force, axial movement and time for stored-energy friction welding	31
		24. Angle centre electrode	36
Section 5. Terms relating to testing	85	25. Swan-necked electrode	36
		26. Example of back-step sequence	41
Section 6. Terms relating to weld imperfections	89	27. Example of skip sequence	41
		28. Examples of block sequences	42
Section 7. Terms relating to thermal cutting	93	29. Sketches of types of joints, types of weld(s) and weld preparations	43
Subsection		30. Gap, root face, root radius, land, included angle and angle of bevel for typical weld preparations	49
71. Terms relating to more than one subsection	93	31. Examples of toes, legs and weld widths	51
72. Terms relating only to oxygen cutting	96	32. Roots of typical weld preparations	52
73. Terms relating only to arc cutting	98	33. Actual throat thickness and design throat thickness of typical welds	53
74. Terms relating only to spark erosion cutting	98		
75. Terms relating only to electron beam cutting	98		
76. Terms relating only to laser cutting	99		
Appendices			
A. Typical information to appear on a welding procedure sheet for flash welding	100		
B. Typical information to appear on a welding procedure sheet for spot welding	100		
C. Typical information to appear on a welding procedure sheet for seam welding	100		
D. Typical information to appear on a welding procedure sheet for projection welding	100		
E. Typical information to appear on a welding procedure sheet for friction welding	101		

	Page		Page
34. Examples of excess weld metal	54	56. Diminishing bell butt joint	82
35. Welding positions: slope (s)	56	57. Short bell branch joint	83
36. Schematic diagram of main welding positions	56	58. U-tensile test specimen	86
37. Simplified view of main welding positions	57	59. Cruciform test pieces	86
38. Comparison of UK(USA) and ISO welding positions	58	60. Method of obtaining cruciform test specimen	87
39. Penetration bead	60	61. Tongue-bend test specimen	87
40. Weld preparation using a fusible insert	61	62. Shear test piece	88
41. Surge reignition	66	63. Excess penetration bead	89
42. Types of rectification	67	64. Root concavity	89
43. Neutral oxy-acetylene flame	72	65. Incompletely filled groove	89
44. Carburizing oxy-acetylene flame	72	66. Shrinkage groove	89
45. Carburizing oxy-acetylene flame for a hard surfacing application	73	67. Undercut	89
46. Oxidizing oxy-acetylene flame	73	68. Lack of sidewall fusion	90
47. Leftward welding	74	69. Lack of root fusion	90
48. Rightward welding	74	70. Lack of inter-run fusion	91
49. All-position rightward welding	74	71. Incomplete root penetration	91
50. Basic equipment for aluminothermic welding	75	72. Drag	93
51. Diagrammatic representation of a diode gun	77	73. Single-cantilever cutting machine	94
52. Diagrammatic representation of a triode gun	77	74. Double-cantilever cutting machine	94
53. Diagrammatic representation of a back-bombarded gun	78	75. Extended boom single-cantilever cutting machine	95
